

Oxygen Forensic[®] Detective

BUILT-IN ANALYTICS

Built-in

Easy to Use

Powerful and Fast

Analyze extractions and entire cases:

Image Categorization

Automatically **detect visual threats** in images and tag them.

Timeline

Browse and view all events in a **customizable** Timeline. Add filters to adjust.

Key Evidence

All **important data** in one place. Add tags, notes and export selectively.

Social Graph

Visualize all the **social connections**. Filter data by multiple criteria.

Search

Scan the device for **keywords**, **hash sets** and **regular expressions**.

Statistics

Overview **highlights** of the entire extraction and **identify sections of interest**.

OCR

Convert words in images into searchable machine-encoded text.

Facial Categorization

Categorize human faces and identify similar ones.
